## Summary

A Fullstack Developer with strong expertise in creating dynamic, high-performance web experiences, skilled in React, Laravel, Node.js, and Next.js. Successfully designed and launched 6 websites and 4 web applications at Pamtech Group, significantly boosting SEO and reducing load times by 30% at Dishquo. Led a team to develop a result management system at Acheva, enhancing security and user engagement. Eager to leverage these skills to improve user engagement and performance in a front-end development role. Most importantly, I can adapt and learn new resources quickly, as long as they aid productivity.

## Work Experience

### Hitsvilla NG | Frontend Engineer

Jan 2025 - Present

- Collaborated with crossfunctional teams (design, backend, QA) to streamline feature delivery and improve communication across the product lifecycle.
- Implemented clientside caching to persist user progress between pages, enabling seamless session continuation and boosting engagement.
- Refactored API integrations into clear “queries” and “mutations” layers and squashed frontend rendering glitches—cutting overall page load time by 40%.

### Pamtech Group | Software Engineer

Aug 2024 - Feb 2024

Distribution and supply of Oil and Gas products.

- Built pamtechgroup.com, decreased load time by 72% by reducing image sizes and using only necessary animations.
- Developed a booking appointment platform for pamtechautoland.com, and increased customer satisfaction by 40%.
- Built Pamtech Autoland application for managing customer car data, which streamlined repair processes and improved service efficiency
- Implemented an automated platform for managing customers' car data, enabling easier car rentals.

### Acheva | Front End Engineer

Mar 2023 - Present

A digital solutions company focused on improving hiring experience.

- Enhanced the back-end flow by developing and structuring it, which improved system efficiency and ensured seamless integration with front-end applications.
- Optimized real-time data processing, resulting in a 62% performance increase.
- Implemented data security measures, reducing risk of data breaches by 50%.

### Hayapal | Back End Engineer

Oct 2023 - May 2024

A digital solutions company focused on improving hiring experience.

- Enhanced the back-end flow by developing and structuring it, which improved system efficiency and ensured seamless integration with front-end applications.
- Optimized real-time data processing, resulting in a 62% performance increase.
- Implemented data security measures, reducing risk of data breaches by 50%.

### 6ps Group LLC | Software Engineer

Nov 2022 - Jan 2024

A digital solutions provider focused on web development.

- Collaborated with clients to conceptualize and implement customized web solutions, enhancing user engagement and satisfaction.
- Built responsive layouts for backend integration, improving cross-platform accessibility and user experience.
- Implemented optimization techniques leading to 30% reduction in load time.

### Dishquo | Frontend Engineer

Sep 2022 - Dec 2023

A company that brings healthy food and and Nutritionists to their end user.

- Implemented design flow using frontend technologies, enhancing user interface consistency and user engagement.
- Reduced initial load time by 30% through optimization techniques.
- Organized code structure for improved readability and scalability, leading to more efficient development and easier maintenance

### Phono | Front End Developer

Nov 2022 - Jan 2023

A tech company focusing on music production solutions.

- Wrote comprehensive documentation for libraries used in the project, enhancing team understanding and facilitating smoother onboarding for new developers.
- Built a custom design layout from scratch for the MVP, improving user engagement and providing a seamless user experience.
- Collaborated with backend engineer to create a dynamic layout, resulting in a more responsive and interactive application.
